DETAILED ACTION

On August 27, 2007, an Office Action was sent to the Applicant rejecting claims 3, 5-21, and 23. On October 22, 2007, the Applicant responded with arguments.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3, 5-21, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kiel (2003/0027549) in view of Cromer (7,113,497), as set forth in the previous Office Action.

Response to Arguments

Applicant's arguments filed October 22, 2007 have been fully considered but they are not persuasive. The Applicant argues that neither Kiel nor Cromer disclose or teach "imposing a more restrictive bandwidth on that subscriber". In response, Kiel discloses tracking wireless network data consumption, but does not disclose "imposing a more

restrictive bandwidth on that subscriber". Cromer teaches managing bandwidth utilization in a wireless network (col.2, lines 45-46). The client's individual bandwidth utilization is compared with a threshold transmission bandwidth utilization. If the individual bandwidth utilization is greater than the threshold, then client is prevented from using the individual bandwidth until it is determined that the client is no longer greater than the threshold (col.3, lines 5-23). The Examiner found it to have been obvious to incorporate the teachings of Cromer within Kiel for the motivation of being able to further regulate wireless consumption.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
